

Exhibit 6

MetaBirkins

MetaBirkins is a collection of 100 unique Birkin NFTs created with faux fur in a range of contemporary color and graphic executions. MetaBirkins are a tribute to Hermes' most famous handbag, the Birkin, one of the most exclusive, well-made luxury accessories. Its notorious waitlist, intimidating price tags, and extreme scarcity have made it a highly coveted "holy grail" handbag that doubles as an investment or store of value.

Creator Mason Rothschild began working on MetaBirkins shortly after the success of Baby Birkin, a one-of-one, NFT covered by Forbes and Vogue that sold at auction for 5.5 ETH. In response to the community demand, Rothschild developed a new series, this time inspired by the acceleration of fashion's "fur free" initiatives and embrace of alternative textiles.

MetaBirkins will be launching at Art Basel Miami Beach and available to mint for 0.1 ETH.
